Colorado Lactation Journal Club
Moderated by Kelly McMullen, MD, CLC
Family Physician, Lowry Family Health Center, Denver Health
Assistant Professor, Department of Family Medicine, University of Colorado

Breastfeeding and Breast Cancer
Virginia Borges, MD, an oncologist with UCHealth in Aurora and Lone Tree will present current protocols and recommendations for diagnosing and planning treatment for breast cancer in breastfeeding parents.

Case Study: Failed Lactogenesis with Retained Placenta
Diane Christopher, MD, and Obstetrician/Gynecologist and Assistant Professor at UC Denver School of Medicine will present a case study of delayed lactation in a patient with retained placenta.

Learning Objectives:
1. Summarize recommendations for breast cancer screening procedures during lactation.
2. Differentiate between breast cancer treatments that require weaning and those that do not.
3. In the case of delayed lactation, identify signs that suggest the patient may have retained placental tissue after delivery.
